CONCIERGE DISPLAY

MEETING ROOM DISPLAY SOFTWARE

MEETING ROOM DISPLAY SOFTWARE THAT PROVIDES A COMPLETE OVERVIEW OVER THE DAILY ACTIVITIES IN THE MEETING ROOMS. EMPLOYEES CAN BOOK THE MEETING ROOMS DIRECTLY FROM THE SCREENS AND THE LAYOUT CAN BE CUSTOMIZED FOR THE INDIVIDUAL ORGANIZATION'S NEEDS.

CONCIERGE DISPLAY is an extremely user friendly meeting room display software that provides the employee with the possibility to see meetings in the rooms and make ad hoc meeting room bookings directly from the screens.

The software is easy to install and has many customization possibilities, ensuring that the meeting room display screens can have a layout that fits the needs of the individual organization.

Meeting rooms that are booked from the screens will immediately appear as booked on the Microsoft Exchange Server, ensuring that no rooms can be double booked.

CONCIERGE DISPLAY requires that meeting rooms are set up as mail boxes in Microsoft Exchange.

CONCIERGE DISPLAY is a module to the room and resource booking software CONCIERGE SERVICES. CONCIERGE DISPLAY does not require any other CONCIERGE SERVICES modules and can therefore be used as a standalone product.

CONCIERGE SERVICES is a complete meeting space and resource booking software for Microsoft Outlook. The software suite makes it easy to book meeting rooms, resources and services for meetings.

Visitor management, central meeting administration and integration to an ERP-application are also possible.

CONCIERGE DISPLAY FUNCTIONALITY

- ✓ Displays information about current meetings.
- ✓ Displays information about future meetings
- ✓ Possible to book the meeting rooms directly from the screens (requires touch screens).
- ✓ Possible to prolong a meeting directly from the screen (requires touch screens).
- ✓ Possible to end a meeting directly from the screen (requires touch screens).
- ✓ Possible to require that meetings in the room are accepted on the screen between XX minutes prior to the scheduled initiation of the meeting and XX minutes after the scheduled beginning - otherwise, the room is freed on the Microsoft Exchange server.
- ✓ The display screens can have green backgrounds when rooms are available and red backgrounds when they are occupied.
- ✓ Possible to customize the lay out for the individual organization's needs.
- ✓ The screens can also be used for booking of other resources such as cars or audio visual equipment.
- ✓ The display software supports all internet browsers, e.g. Internet Explorer, IOS Safari, etc.

OTHER CONCIERGE SERVICES MODULES AND OPPORTUNITIES

CASE STORY RAMBOLL

Ramboll are using iPads as meeting room displays at their head office in Copenhagen. The screens are displaying information about meetings in the rooms and the employees can book the rooms directly from the iPads. Ramboll have 54 meeting rooms with a connected iPad.

“ We wanted meeting room displays that would improve the communication and the use of our meeting rooms. We can book the rooms directly from the screens and also see when the next meeting takes place. The display functionality works brilliantly and with Fischer & Kern’s help we got everything as we wanted. ”

Senior Project
Manager
Rasmus Paludan

CONCIERGE DISPLAY BENEFITS

- ✓ Easy to make ad hoc meeting room bookings.
- ✓ Easy to see who uses the meeting rooms.
- ✓ Provides a complete overview over the meeting rooms’ availability.
- ✓ Works with all screens. It is therefore possible to use for instance iPads as meeting room display screens.
- ✓ Provides the organization with an inviting and professional office environment.
- ✓ Meeting rooms can be freed on the Microsoft Exchange Server if the user doesn’t accept the booking when he enters the meeting. Thus making it possible for other users to book the meeting room.
- ✓ Provides visitors and employees with a complete overview of meetings in the rooms.
- ✓ Many possibilities for customization of layout. Ensuring that the screens have the right colors, logo, etc.

TECHNICAL BENEFITS AND REQUIREMENTS

CONCIERGE DISPLAY is a web application that works with all internet browsers supporting CSS, JavaScript and AJAX, e.g. Internet Explorer 5.0 or newer and IOS Safari. CONCIERGE DISPLAY does not require any installation on the Microsoft Exchange Server.

Server-side requirements:

- Microsoft Windows Server 2003 or newer.
- Microsoft .Net Framework 3.5.
- Microsoft Internet Information Server 6.0 or newer.

Microsoft Exchange Server requirements:

- Server: Microsoft Exchange 5.5 or newer.

PRICES

The price on CONCIERGE DISPLAY is determined by the number of meeting rooms. We will be happy to send a price list or prepare an offer for the individual customer.

SERVICE AGREEMENT

The service agreement provides the organization with free support and version updating.

The service agreement is 18 % of the total license list prices per year.
