

# PRIMETIMER

## EASY, FAST AND EFFICIENT TIME TRACKING DIRECTLY THROUGH MICROSOFT OUTLOOK

Detailed time tracking is often a disincentive for employees. It is therefore important that the daily time tracking is done as automatically as possible and with minimal effort for each employee.

PRIME TIMER is the solution, where planning and time management is integrated into one system: Microsoft Outlook. This optimizes staff motivation with improved data quality as a result.

### ADVANTAGES

- Improves quality of time records - and minimize time at follow-up.
- Provides a strong basis for estimates of the projects.
- Clear connection between planning of the project and storing of the time actually spent.
- Offered as a license which easily and effortlessly can be installed on an existing MS Exchange Server.
- The solution can be delivered as a single project that contains the necessary standard components for system setup and documentation, user manuals and training.

### RESULT

- Optimal opportunity for proactive time management when planning and registration is merged.
- Eliminates the need for double entries.
- Gives each employee a good overview of time spent by projects, tasks and stakeholders.

### FUNCTIONS IN PRIMETIMER

- Requires only to enter data once. Then the data will be reused and automatically collected to further treatment, statistics and reports.
- Is an extension of the existing facilities in the most common mail and calendar system: Microsoft Outlook.
- Allows employees to register time online and offline.
- Allows the recording of time spent in any number of levels, eg by customers, projects, activities and staff.
- Can be integrated with the organization's other systems with the ability to retrieve data from - and deliver data to - the most common administrative systems.
- Is an open platform that can easily be adapted to each organization.
- Gives employees the opportunity for input through a standard Microsoft Outlook client.

## SYSTEM REQUIREMENTS

The use of PRIMETIMER requires that the customer has installed the following applications:

### Client.

Microsoft Outlook 2007 or later.  
Microsoft .Net 3.5 Framework or later.
